Agenda

New Business

- Add new functional requirements
- Decide use-cases, if login API doesn't unavailable.
- Decide Use-Case chart format

New Business

1. Add new functional requirements.

We append some requirements at previous use cases.

- **Weekly Menu:**
 - 1). For each cafeteria, user can change their preference with dragging the cafeteria panel.
 - 2). User can change the mealtime(Breakfast/Lunch/Dinner) with swiping.
- **School Bus Schedule:**
 - 1). The application show current bus's location using Animation view.
- **Student Mobile ID:** Not updated.
- **Lecture Schedule:**
 - 1). Share my schedule via 'Kakao Talk'.
 - 2). Highlight current time's schedule.
 - 3). Add user schedule onto lecture schedule.
- **BBS:** Not updated.
- **Login:**
 - 1). Login when only the function needs authorization.
 - 2). (If possible,) Automatic Login.

2. Decide use-cases, if login API doesn't unavailable.

- **Check library seat**
User can check current library seat
- **Search library books**
User can search library books and check the book is currently existing at the library.
- **School Calendar**
 - 1) User can see the school's yearly schedule.
 - 2) Notify the user selected calendar when the day is coming.
- **School Phone Book**
User can find the school phone number.
- **School Bus Schedule**
Same with original
- **Weekly Menu**
Same with original.

3. Decide Use-Case chart format

We selected eight use case chart field; **Use Case Name, Goal, Category, Trigger, Precondition, Basic Path, Alternative Paths, Postcondition.**
